

## **Institutional Distinctiveness**

Mahaveer Ambesh Guru College is a reputed institute in Mavli- Fatehnagar, District- Udaipur (Rajasthan). MAGC was established in 2004 to impart quality education to students. In the past decade by imparting quality education, MAGC has attracted students from all sections of society. The institution committed to students service and excellence for imparting good education. This college has tried to upgrade itself better in the field of education towards the students, due to which today we are working as the most reliable college of this area. The main objective of this college is to impart quality education. With a very modest beginning of merely 89 students, today the college has a very good number of students and committed and dedicated teachers. The college started in the first year with commerce and arts. At present commerce, Arts, Science are all three faculties are conducted. The college has always tried to fulfill its role and responsibility very well. Being located in the middle of 3 districts (Udaipur, Rajsamand & Chittorgarh), this institute has provided opportunities for higher studies to the students of rural and backward areas.

This college claims distinctiveness in terms of social outreach programmes. Social awareness rallies conducted on various issues like National Unity Day, Blood Donation, AIDS, Human rights and right to vote manifest the intent of the institution in terms of social transformation. The college has worked immensely in the domain of voluntary blood donation; organizing blood donation camp has been a main highlight of the college's annual calendar for a decade now. The college has received awards and acknowledgment from Rajasthan State AIDS Control Society and National AIDS Control organization for red ribbon club activities in year

2012-13. This program is sponsored and organized with the cooperation from local bodies like Lions club and Bhamashah etc. Blood group determination and Hb test by invited medical teams from R.N.T. Medical College Udaipur (Govt of Rajasthan) and sometimes from Saral Blood Bank. Under the guidance of the team, the eligible donor is selected on the right basis so that there is no risk of harm to anyone's health. It has always been successful with the help of public, student cooperation and support of the institute staff.

## **BEST PRACTICES – 2021-22**

### **1. Title – Vaccination Camp**

#### **Objectives -**

- To ensure that students are vaccinated on both dose of Covid- 19.
- To create awareness by providing correct and accurate information to villagers by removing myth related to corona.

**Context and Practice:** The College organized vaccination camp to ensure that students must be vaccinated from both dose of Covid -19. Students get vaccinated by medical team from Primary Health Center of Fatehnagar. N.S.S. Students also create awareness by providing right and accurate information regarding corona and also explained to take precautions. The college also distributed mask and sanitizer among villagers.

**Evidence Of Success -** The Students were very happy with this camp because those who were yet to get second dose, they got vaccinated and those who had not been vaccinated also get the first dose of Covid -19 vaccine.

### **2. Title – Tree Plantation**

#### **Objectives –**

- To create awareness among the students regarding the values of Plants.

**Context and Practice:** Trees help to combat global warming by absorbing carbon dioxide, control temperatures, provide livelihood to people, source of food and shelter, healer of diseases etc. So to make contribution in environment

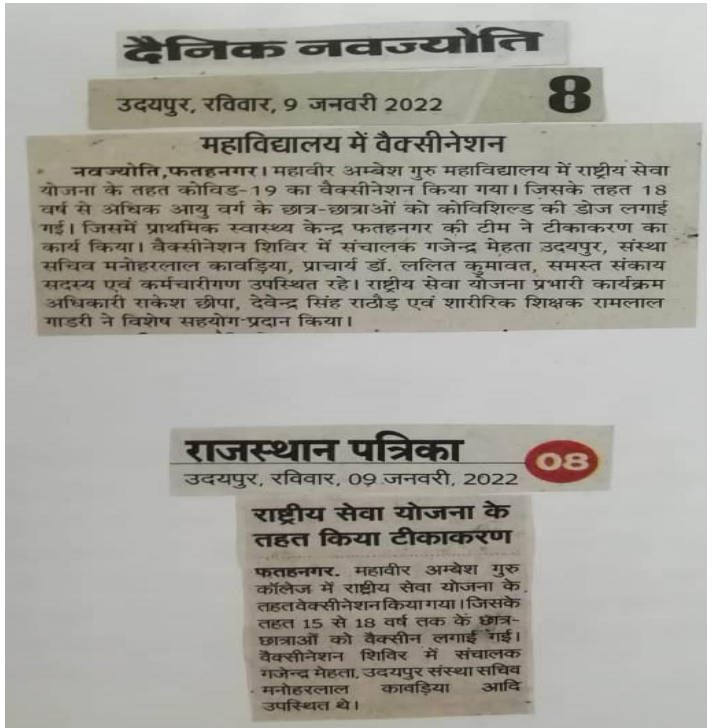

sustainability, plantation was done in their adopted village Chundawat Khedi as a part of N.S.S. activity. It is important duty of students to plant more and more trees because they are our livelihood and the program is successful only when our new generation becomes more & more sincere and active towards tree plantation.

**Evidence of Success** – we have made sincere tree plantation and Students were also inspired to plant more and more trees and they planted near about 20 plants.

**Problems encountered and resource required** – Due to heavy rains and no availability of tree guards, plants did not grow up so well and some died also, so in coming session we have decided that in next time plantation, we will also provide free tree guard and will give responsibility to every students to take full care of it until the plants grows up as a part of N.S.S. activity.
